Opinion of the United States Court of Appeals for the Fifth Circuit

#### UNITED STATES COURT OF APPEALS

FOR THE FIFTH CIRCUIT

FILED -

JUN 23 1992

No. 90-4467

GILBERT E GANUGHEAU

UNITED STATES OF AMERICA,

Plaintiff-Appellee Cross-Appellant

versus

JAMES EDWIN SHERROD,

Defendant-Appellant Cross-Appellee,

and

STEVEN LEE SHERROD, a/k/a William Wayne Embry and LONNIE JERRELL COOPER,

Defendants-Appellants,

JERRY WAYNE SEWELL, II and JERRY WAYNE SEWELL, SR.,

Defendants-Appellants Cross-Appellees.

Appeals from the United States District Court for the Eastern District of Texas

Before GARWOOD and DEMOSS, Circuit Judges, and LITTLE, District Judge.

District Judge of the Western District of Louisiana, sitting by designation.

GARWOOD, Circuit Judge:

A jury convicted the five defendants-appellants now before
this Court of three counts involving, inter alia, conspiracy to
manufacture and mathe manufacture. Of apphenylacetone cande counts.
methamphetamine. We affirm the convictions and sentences of all
five defendants.

#### Proceedings Below

Defendants Jerry Wayne Sewell, Sr. (Sewell, Sr.), Jerry Wayne Sewell II (Sewell II), Lonnie Jarrell Cooper (Cooper), James Sherrod, and Steven Sherrod were charged in a May 1989 superseding indictment. Also charged in this indictment were co-defendants Jack Rhodes (Rhodes), Dan Hill (Hill), Lisa Ervin (Ervin), and Darlene Roznovsky (Roznovsky). The indictment contained three counts: (1) conspiracy to (a) manufacture phenylacetone (P2P), amphetamine, and methamphetamine, (b) possess amphetamine and methamphetamine with the intent to distribute, and (c) distribute amphetamine and methamphetamine; (2) manufacturing P2P; and (3) manufacturing a mixture containing methamphetamine. The conspiracy charge and the charge of manufacturing the methamphetamine mixture alleged enhanced penalty provisions for violations of 21 U.S.C. 55

846 and 841(a)(1) involving a kilogram or more of a mixture or substance containing a detectable amount of methamphetamine.

Following a jury trial in October and November 1989, defendants were convicted and sentenced on all three counts. They appeal their convictions and sentences on constitutional and evidentiary grounds. The Government cross-appeals the sentences of James Sherrod, Sewell, Sr., and Sewell II, alleging noncompliance with the sentencing guidelines and statutory minimum sentence provisions.

## **Factual Background**

In early 1989, law enforcement officials from the Sheriff's Department of Calcasieu Parish, Louisiana, began working with a confidential informant, Danny Johnson (Johnson), to identify and apprehend individuals involved in drug trafficking in the area. Among the names given to the authorities by Johnson was that of defendant Sewell, Sr., from whom Johnson had previously obtained methamphetamine. One of the primary goals of Johnson's cooperation with the Calcasieu Parish Sheriff's Department was to locate the laboratory source of Sewell, Sr.'s methamphetamine.

When Johnson first began work as an informant, the law enforcement officials' focus was on Sewell, Sr.'s connections with a source of methamphetamine in San Antonio, Texas, known as "Fred."

The original indictment, filed in March 1989, charged these defendants with two counts, neither of which contained an enhanced penalty provision: (1) conspiracy to manufacture P2P, amphetamine, and methamphetamine; and (2) manufacturing P2P.

These four co-defendants entered into plea arrangements with the Government. Each testified at trial for the Government, except Hill, who testified for the defense. None of these four are parties to the present appeal.

Johnson had agreed to act as a government informant in return for special treatment respecting drug charges pending against him.

Johnson also named Ervin, Roznovsky, and Cooper as associates of Sewell, Sr. who were involved in drug dealing.

Because of financial problems with Fred, however, Sewell, Sr. began making arrangements to manufacture amphetamine and methamphetamine independently.

Preparations were begun for making the drugs: several conversations concerning the conspiracy were held in Cooper's auto mechanic shop in Mossville, Louisiana; Rhodes, an associate of Sewell, Sr. from Oklahoma, located a chemist, or "cook"; Cooper compiled a list of the chemicals and equipment necessary for the laboratory process; Sewell II and Roznovsky collected equipment and chemicals stored on Sewell, Sr.'s property; Sewell II, Steven Sherrod, and Rhodes helped load the items into Rhodes' car, a 1977 Cadillac, for transport to the laboratory site, which was in a semi-rural area near Orange, Texas.

On March 8, 1989, Johnson, Rhodes, Steven Sherrod, and James Sherrod drove to Dallas in the Cadillac. In Dallas, they met Roznovsky who had gone there to purchase the remaining chemicals and laboratory equipment. These items were placed in the trunk of the Cadillac, along with the equipment and chemicals that had come from Sewell, Sr. The four men then continued on to Lake Charles, Louisiana, where Johnson had an apartment.

Law enforcement officials, in close contact with Johnson, kept the Cadillac under surveillance and contacted the Texas Department of Public Safety (DPS) to arrange a stop of the vehicle in order to obtain the identity of its occupants. A DPS patrolman stopped the car near Beaumont on the pretext that a tail light was malfunctioning. He ascertained that the occupants were Johnson, Rhodes, and James Sherrod; Steven Sherrod produced false identification giving his name as William Wayne Embry. The DPS officer, as requested by Louisiana law enforcement officers, did not search the car.

Once the four men arrived in Lake Charles, Johnson contacted Cooper to get directions to the laboratory. Cooper arranged to lead them to the laboratory the next morning. The next day, the group met Cooper at a local truck stop and followed him to an auto mechanic shop near Orange, Texas, owned by Hill. The group unloaded the items from the trunk and carried them to the laboratory, which was set up in an old school bus located behind Hill's trailer. The group discovered that one of the laboratory flasks was the wrong size. Sewell, Sr., who had remained in Bells, Texas, sent Roznovsky to Orange with the proper equipment.

James Sherrod began working in the laboratory on March 9. Hill was also there working on a batch of methamphetamine that he had started before the others arrived. Steven Sherrod and Rhodes stayed in Johnson's apartment in Lake Charles. Johnson made several trips to the laboratory to check on things, reporting by telephone to Sewell, Sr. and Cooper and keeping the law enforcement officials apprised of the situation.

Defendant Steven Sherrod introduced his uncle, defendant James Sherrod, to Rhodes at the beginning of March, 1989. James Sherrod was a chemist in the Dallas area.

Johnson had identified James Sherrod and Steven Sherrod to the authorities only as the "cook" and the "bodyguard," respectively.

The Calcasieu Parish Sheriff's Department, joined by agents from the Drug Enforcement Agency (DEA) and officers from the Orange County police and sheriff departments, maintained a constant surveillance of the Hill property. Early in the morning of March 11, DEA agents obtained a warrant to search the Hill property. The officers planned to wait to execute the warrant until Sewell, Sr. arrived at the laboratory to inspect the finished product. During the afternoon of March 11, however, officers near the laboratory observed Rhodes and Steven Sherrod arrive in the Cadillac, open the trunk of the vehicle, and drive away a few minutes later. Fearing that the defendants were dismantling the laboratory to move it or that Rhodes and Steven Sherrod were removing evidence, officers stopped the Cadillac after it had crossed the state line into Louisiana. Shortly thereafter, the agents executed the search warrant at the laboratory site.

In the school bus, the agents found chemical mixtures in a cake pan, a Coca-Cola syrup canister, and a Mason jar. The agents took samples from each of these containers; tests of these samples revealed methamphetamine. Precursor chemicals were also found in the bus.

At the same time they obtained the search warrant, the agents also obtained from the magistrate issuing the warrant an order permitting them to destroy the chemical mixtures (except for retained samples), provided that photographs were taken of the mixtures and their containers before the destruction. The order did not contain any provision allowing for the destruction of the containers themselves. Nevertheless, where agents at the seene, and decided to destroy the containers as well because they were contaminated by the hazardous chemical mixtures. Samples of the mixtures from at least two of the containers were retained, and later tested.

Defendants were arrested and indicted on conspiracy and manufacturing charges.

#### Discussion

#### Cross Appeal.

The Government cross-appeals the sentences of Sewell, Sr. and Sewell II, contending that the district court erred in applying the statutory minimum penalty provisions of 21 U.S.C. § 841(b)(1)(B) instead of those of section 841(b)(1)(A).

<sup>7</sup> The methamphetamine mixtures found were in the process of formation.

The DEA agents found 4,750 grams of P2P, a precursor chemical necessary for the manufacture of amphetamine and methamphetamine.

Agents participating in the search took still photographs and made a video of the laboratory scene.

Destruction of the containers was proper according to DEA policy and Environmental Protection Agency guidelines.

Only the sentences of the Sewells will be considered in the determination of this issue; the sentences of the other defendants fall within the scope of either subsection.

We note that although many other sections of the 1988 Anti-Drug Abuse Amendments Act did not become effective until March 18, 1989 (120 days after enactment on November 18, 1988), Subtitle N of P.L. 100-690, which added sections 841(b)(1)(A)(viii) and 841(b)(1)(B)(viii), does not contain a provision for delayed effectiveness. A statute that does not provide otherwise becomes effective upon enactment. United States v. Robles-Pantoja, 887 P.2d 1250, 1257 (5th Cir. 1989). Because there is no provision to the contrary, the amendments under which the defendants were sentenced became effective in November 1988, prior to the conduct

The version of 21 U.S.C. § 841 that was in effect at the time of the offenses set forth two different penalties for identical violations of section 841(a)<sup>12</sup> involving one hundred grams or more of a mixture or substance containing a detectable amount of methamphetamine.<sup>13</sup> Under section 841(b)(1)(A), the penalty for a first-time offender was a term of imprisonment which could not be less than ten years or more than life; for a defendant with two or more final convictions for a felony drug offense, the penalty was "a mandatory term of life imprisonment without release." Section 841(b)(1)(B) provided a penalty for the same violation of a term of imprisonment which could not be less than five years and not more than forty years; if the defendant had a prior final conviction for a drug-related felony, the sentence was for a term of imprisonment not less than ten years and not more than life.

Sewell, Sr. and Sewell II were convicted of manufacturing 17.5 kilograms of a mixture containing a detectable amount of methamphetamine and were sentenced under section 841(b)(1)(B). Sewell II received the statutory minimum sentence of five years' imprisonment on each count, running concurrently. Sewell, Sr. had three prior convictions for drug-related felonies and therefore was

for which the defendants were convicted.

subject to the more serious penalty. He received concurrent sentences of 360 months on all counts.

The Government contends that the Sewells should have been sentenced under section 841(b)(1)(A). Under this provision, Sewell ...

II would have received a minimum sentence of ten years and Sewell,

Sr. would have received a mandatory life sentence.

Although we would tend to agree with the Government under the current version of the statute, we are unable to do so under the version in effect at the time of the offense. United States v. Kinder, 946 F.2d 362, 367-68 (5th Cir. 1991) (remanding for resentencing under section 841(b)(1)(B) because the district court violated the rule of lenity). Following Kinder, we hold that the district court did not err in sentencing the Sewells under section 841(b)(1)(B).

# II. Sentences of Lonnie Cooper and James Sherrod.

The Government also cross-appeals the sentence of James Sherrod, arguing that the district court should have increased his Guidelines range three levels for supervisor/manager status based upon his role as the chemist. See U.S.S.G. § 3B1.1(b). 14 Cooper raises the opposite claim, contending that the district court erred in finding him to be a supervisor/manager and in raising his Guidelines level by the required three levels. Cooper contends not

<sup>21</sup> U.S.C. § 841(a)(1) makes unlawful the knowing or intentional manufacture of a controlled substance.

This overlap of penalties was due to a technical error in the 1988 Anti-Drug Abuse Amendments Act, which was corrected by amendment in 1990. Section 841(b)(1)(A) now applies to violations involving one kilogram or more of a substance containing a detectable amount of methamphetamine.

In determining whether a defendant played a supervisor/manager role in an offense, a court should consider such factors as the exercise of decision-making authority, the degree of participation in planning or organizing the offense, and the degree of control and authority exercised over others. U.S.S.G. § 3B1.1, Application Note 3.

only that he was not a manager or supervisor but that he was entitled to a reduction of two to four levels because of his minimal or minor role in the group. See U.S.S.G. § 3B1.2.15

This Court will uphold the district court's Guidelines sentence if it results from a legally correct application of the Guidelines to factual findings that are not clearly erroneous. United States v. Ponce, 917 F.2d 841, 842 (5th Cir. 1990), cert. denied, 111 S.Ct. 1398 (1991); United States v. Manthei, 913 F.2d 1130, 1133 (5th Cir. 1990); United States v. Suarez, 911 F.2d 1016, 1018 (5th Cir. 1990). A finding of fact is not clearly erroneous if it is plausible in light of the record viewed in its entirety. Anderson v. Bessemer City, 470 U.S. 564, 573-76 (1985). We review legal conclusions concerning the Guidelines de novo. Manthei, 913 F.2d at 1133.

After reviewing the mecord, we conclude that the factual findings made by the district court in this respect were not clearly erroneous. Although James Sherrod, as the chemist, was undoubtedly a necessary member of the conspiracy, the record supports the district court's finding that he did not manage any part of the conspiracy. Likewise, although Cooper claims that he played a minimal or minor role in the conspiracy, the district

court's finding that Cooper coordinated the set up of the laboratory is based on ample evidence in the record, and adequately supports the determination that he was neither a minimal nor a minor participant. If the resum has been ween the set up of the

Pinding no error, we affirm the sentences of James Sherrod and Lonnie Cooper.

III. Issues Related to the Finding that the Conspiracy Involved 17.5 Kilograms.

The defendants raise three issues related to the district court's finding that the conspiracy involved 17.5 kilograms of the methamphetamine mixture. First, they contend that their rights to due process and confrontation were violated because the mixtures (other than retained samples) and containers were destroyed before anyone made an accurate measurement of the amount of the mixture. Second, they claim that the district court erred in finding that the laboratory contained 17.5 kilograms of the mixture. Finally, they argue that the district court should not have sentenced them on the basis of the entire 17.5 kilograms because the mixture contained only a little pure methamphetamine. We reject each of these contentions.

A. Destruction of physical evidence

Each defendant claims he was denied his constitutional rights to due process and confrontation because the Government destroyed

Application Note 1 to section 3B1.2(a) defines a minimal participant as one who is "plainly among the least culpable of those involved in the conduct of a group," as indicated by "the defendant's lack of knowledge or understanding of the scope and structure of the enterprise and of the activities of others."

A minor participant is one who is "less culpable than most other participants, but whose role could not be described as minimal." Section 3B1.2, Application Note 3.

For example, there is evidence that Cooper compiled a list of chemicals and equipment needed at the laboratory, that Cooper called Hill several days before the activity at the laboratory to inform Hill that some people were coming to use the lab, and that Sewell, Sr. instructed Johnson and Roznovsky to keep Cooper informed of the status of the activity at the lab.

the chemical mixtures (other than retained samples) and containers without accurately measuring the mixtures or allowing the defendants the opportunity to measure them. 17

in an opinion deciding the appeal of co-defendant Jack Rhodes. See

United States v. Rhodes, No. 90-4538 (5th Cir. September 27, 1991)

(unpublished opinion). It is a general rule in this Circuit that
one panel may not overrule the decision of a prior panel in the
absence of an intervening contrary or superseding decision by the
court en banc or the Supreme Court. See, e.g., Pruitt v. Levi

Strauss & Co., 932 F.2d 458, 465 (5th Cir. 1991). Thus we are
bound to follow the decision in Rhodes on issues previously
decided.

This Court in Rhodes held that the destruction of the methamphetamine and containers did not deprive co-defendant Rhodes of his rights to due process or confrontation. "The process due a defendant who believes that the sentencing information is incorrect is the opportunity to show that the information is materially untrue." Rhodes, at p. 4 (citing United States v. Rodriguez, 897)

The defendants were aware long prior to their sentencings that the Government would request sentencing based upon the methamphetamine mixture being in the amount of 17.5 kilograms. The evidence produced by the Government at the trial in October and November 1989 was that the laboratory contained 17.5 kilograms of the methamphetamine mixture. In addition, the presentence reports for each defendant calculated the Guidelines sentencing level using the 17.5 kilogram figure.

The defendants were afforded ample opportunity to attempt to show that the Government's evidence was incorrect. James Sherrod and Hill testified about the quantity of drugs at James Sherrod's sentencing hearing, and James Sherrod testified on this issue again at Sewell, Sr.'s sentencing hearing. Counsel for all defendants were present at both hearings and were given an opportunity to question the witnesses. That the district court obviously found the Government's evidence more credible does not prove a due process violation.

The defendants also were not deprived of their right to confrontation. This right is substantially limited at a sentencing hearing; the district court may even base its findings on out-of-court statements. Rhodes, at p. 5; Rodriguez, 897 F.2d at 1328. Although the defendants did not choose to make use of the opportunity, they could have called the DEA chemist, George Lester, to the stand at the sentencings to testify regarding the calculations of the volumes of the canister and the pan.

We note that proof of the quantity of drugs involved does not go to guilt or innocence of the section 846 and section 841(a) violations charged, but rather only to the sentence. See Barnes v. United States, 586 F.2d 1052, 1056 (5th Cir. 1978). Here, the indictment alleged that the quantity involved was more than one kilogram of a mixture containing methamphetamine. Cf. United States v. Alvarez, 735 F.2d 461, 468 (11th Cir. 1984). There was no real dispute that the mixture involved did contain methamphetamine (the retained samples and the test results were made available to defendants) and that the quantity of the mixture was more than one kilogram; the dispute was whether it was only four or five kilograms or more than seventeen.

We hold that the destruction of the methamphetamine mixtures (other than the retained samples) and their containers did not deprive the defendants of their constitutional rights. 18

B. Factual findings of the amount of methamphetamine.

The defendants contend that the district court erred in finding that the amount of the methamphetamine mixture found in the laboratory was 17.5 kilograms.

This Court will uphold a district court's findings about the quantity of drugs involved unless they are clearly erroneous. United States v. Ponce, 917 F.2d 841, 842 (5th Cir. 1990). A clearly erroneous finding is one that is not plausible in the light of the record viewed in its entirety. Anderson v. Bessemer City, 105 S.Ct. 1504 (1985).

In determining drug quantities, the district court may consider any evidence which has "sufficient indicia of

For due process considerations, see California v. Trombetta, 104 S.Ct. 2528, 2529 (1984) (defendant's due process rights violated only if the evidence destroyed (1) possessed an exculpatory value that was apparent before it was destroyed and (2) was of such a nature that the defendant would be unable to obtain comparable evidence by other reasonably available means); United States v. Binker, 795 F.2d 1218, 1230 (5th Cir. 1986) (applying Trombetta in the context of destruction of marijuana), cert. denied, 107 S.Ct. 1287 (1987); United States v. Webster, 750 F.2d 307 (5th Cir. 1984) (same), cert. denied, 105 S.Ct. 2340 (1985).

On the issue of the right to confrontation, see United States v. Herndon, 536 F.2d 1027, 1029 (5th Cir. 1976) (destruction of a sample of "moonshine" liquor did not deprive a defendant of his Sixth Amendment right to confront witnesses as the Confrontation Clause is restricted to "witnesses" and does not include physical evidence; production of the sample or laboratory notes was not necessary to fully "confront" the government's expert); United States v. Gordon, 580 F.2d 827, 837 (5th Cir.) (following Herndon), cert. denied, 99 S.Ct. 731 (1978).

reliability." U.S.S.G. § 6A1.3, comment; United States v. Manthei, 913 F.2d 1130, 1138 (5th Cir. 1990). This evidence may include estimates of the quantity of drugs for sentencing purposes. United States v. Coleman, 947 F.2d 1424, 1428 (10th Cir. 1991), cert. denied, 112 S.Ct. 1590 (1992). The district court's factual findings of the amount of drugs involved must be supported by what it could fairly determine to be a preponderance of the evidence. United States v. Thomas, 932 F.2d 1085, 1091 (5th Cir. 1991), cert denied, 112 S.Ct. 887 (1992).

All of the Government records created at the time of the arrest and search of the laboratory were based on the DEA agents' estimates that the amounts of the mixtures in the cake pan, Coke canister, and Mason jar totalled 4.5 kilograms. These estimates were not based on any accurate measurements made at the scene, but were conservative guesses of the amounts of the mixtures. The Government's trial evidence, however, was that the laboratory contained 17.5 kilograms of the methamphetamine mixture. This evidence consisted of the testimony of DEA Special Agent Shoquist and George Lester, a chemist for the DEA. Before the trial began, Shoquist obtained and measured the capacity of a standard Coke canister of the kind that had been destroyed. Also, he reworked his estimate of the volume of the cake pan based on measurements of the pan made at the time of the cake pan and canister,

Both Shoquist and Lester were present at the time of the search of the laboratory; Lester made the early estimates of 4.5 kilograms.

Lester testified that the methamphetamine mixture found in the laboratory totalled 17.5 kilograms.

Defendants have not overcome their difficult burden of showing that the district court's reliance on the 17.5 kilogram figure was clearly erroneous. Here, the sworn testimony of the two Government agents is a sufficient "indicia of reliability" to support the district court's findings. The district court, after hearing the testimony and viewing all the evidence, found the 17.5 kilogram estimate to be credible. The mere existence of a discrepancy between the original estimate and the evidence introduced at trial does not render the district court's use of the 17.5 kilogram

amount clearly erroneous. 20 See United States v. Rhodes, at pp. 3-4.

We hold that the district court did not err in sentencing the defendants based upon the calculation that 17.5 kilograms of drugs were involved.

#### C. Purity of the methamphetamine mixture

The defendants contend that use of the 17.5 kilogram figure for sentencing constitutes error because the mixture was not pure methamphetamine, and that the district court should have considered only the amount of methamphetamine that could have been produced.

We note in passing that, although the defendants rely vociferously on the apparent discrepancy between the original estimate of 4.5 kilograms and the final calculation of 17.5 kilograms, the effect of the Drug Equivalency Table of the Sentencing Guidelines (as in effect when the offenses were committed; those in effect at sentencing provided a higher base offense level for the same quantity) weakens this reliance.

Because both P2P and methamphetamine were found in the laboratory, the defendants' sentences were calculated by use of the Drug Equivalency Table. The P2P and the methamphetamine were converted into "equivalent" amounts of cocaine, and the total amount of cocaine was used to determine the offense level. If the 4.5 kilogram figure were used, with the 4,750 grams of P2P, the resulting equivalent of 12.95 kilograms of cocaine would establish an offense level of 32. Using the 17.5 kilogram amount of methamphetamine, again with the 4,750 grams of P2P, the total amount of cocaine is 38.95 kilograms, resulting in an offense level of 34.

The breaking point between levels 32 and 34 is between 14.9 and 15.0 kilograms of cocaine. The 4.5 kilogram figure, which the evidence revealed was clearly a conservative estimate, when converted with the P2P, produces a total amount of cocaine that is only two kilograms (of cocaine) away from the breaking point. Thus, although the defendants point out repeatedly that the 17.5 kilograms is almost four times greater than 4.5 kilograms, the same sentencing increase would have resulted if the Government's final calculations had been of 5.5 kilograms of the methamphetamine mixture, merely one kilogram (of methamphetamine mixture) more than the original "conservative" estimate.

This Circuit has held that consideration of the total weight of a substance containing a detectable amount of methamphetamine is proper in determining the defendant's sentence. See United States v. Walker, No. 91-8396, slip op. at 4301-4302 (5th Cir. April 24, 1992); United States v. Mueller, 902 F.2d 336, 345 (5th Cir. 1990); United States v. Butler, 895 F.2d 1016, 1018 (5th Cir. 1989), cert. denied, 111 S.Ct. 82 (1990); United States v. Baker, 883 F.2d 13, 15 (5th Cir.), cert. denied, 110 S.Ct. 517 (1989).

The defendants argue, however, that a recent Supreme Court decision has in effect overruled these cases. See Chapman v. United States, 111 S.Ct. 1919 (1991). In Chapman, the Court held that the weight of blotter paper on which LSD was customarily distributed was a "mixture or substance containing a detectable amount' of LSD," and so was properly considered in determining the proper sentence under the guidelines. Id. at 1925. The Court made clear that Congress intended the carrier medium to be included in the entire weight of the mixture to determine the proper sentence. Id. at 1924. In making this analysis, the Court noted that "Congress adopted a 'market-oriented' approach to punishing drug trafficking, under which the total quantity of what is distributed, rather than the amount of pure drug involved, is used to determine the length of the sentence." Id. at 1925.

Both the Sixth and Tenth Circuits have addressed this issue in the context of methamphetamine since Chapman. See United States v. Jennings, 945 F.2d 129 (6th Cir. 1991); United States v. Fowner, 947 F.2d 954 (10th Cir. 1991) (unpublished opinion), cert. denied,

court pointed out that methamphetamine is not mixed with other chemicals in order to dilute the methamphetamine and increase the amount of saleable mixture; instead, the defendants "were attempting to distill methamphetamine from the otherwise uningestable byproducts of its manufacture." Id. at 137. The court concluded that the district court on remand was limited to sentencing the defendants for the amount of methamphetamine they were capable of producing.

In our recent Walker decision, we expressly declined to follow the Jennings approach.

The interpretation urged by the defendants and adopted by the Sixth Circuit appears to be inconsistent with the statute, the Sentencing Guidelines, and important passages in Chapman.

We note that both the statute and the Sentencing Guidelines distinguish between "pure" methamphetamine and mixtures containing methamphetamine. 21 U.S.C. \$\$ 841(b)(1)(A)(viii) and 841(b)(1)(B)(viii) each expressly set the same penalties based on possession of a much smaller quantity of methamphetamine or possession of a much larger quantity of a "mixture or substance containing a detectable amount of methamphetamine." Similarly, the footnote to the Drug Quantity Table following section 2D1.1 provides that

"[u]nless otherwise specified, the weight of a controlled substance set forth in the table refers to the entire weight of any mixture or substance containing a detectable amount of the controlled substance. . . . In the case of a mixture or substance containing PCP or methamphetamine, use the offense level determined by the entire weight of the mixture or substance or the offense level determined by the weight of the pure PCP or methamphetamine, whichever is greater." U.S.S.G. \$ 2D1.1, Drug Quantity Table (November 1990).

The Drug Table distinguishes between methamphetamine and "pure" methamphetamine.21

The Chapman Court itself noted the statute's and the Sentencing Guidelines' disparate treatment of methamphetamine visa-vis other types of drugs:

"With respect to various drugs, including heroin, cocaine, and LSD, it provides for mandatory minimum sentences for crimes involving certain weights of a 'mixture or substance containing a detectable amount' of the drugs. With respect to other drugs, however, namely PCP or methamphetamine, it provides for a mandatory minimum sentence based either on the weight of a mixture or substance containing a detectable amount of the drug, or on lower weights of pure PCP or methamphetamine. . . . Thus, with respect to these two drugs, Congress clearly distinguished between the pure drug and a 'mixture or substance containing a detectable amount of' the pure drug. But with respect to drugs such as LSD, which petitioners distributed, Congress declared that sentences should be based exclusively on the weight of the 'mixture or substance.' Congress knew how to indicate that the weight of the pure drug was to be used to determine the sentence, and did not make that distinction with respect Chapman, 111 S.Ct. at 1924 (emphasis in to LSD." original).

After distinguishing between the statutory treatment of LSD and methamphetamine, the Court went on to consider whether Congress intended that the weight of LSD carriers be included for sentencing purposes. It is in this context, after, expressly distinguishing by the treatment of methamphetamine and PCP, that the Court established its market-oriented analysis. Thus it does not appear that the Chapman Court intended its market-oriented analysis to be applied to methamphetamine or PCP, and indeed Jennings is the only case that has applied the market-oriented analysis of Chapman to methamphetamine.

In an unpublished opinion, the Tenth Circuit affirmed a sentence that was based on twenty-four gallons of a liquid mixture that contained detectable amounts of methamphetamine, but that the defendant claimed was waste. Fowner, 947 F.2d 954 (Table case). The court concluded, without citing Chapman or Jennings, that so long as the mixture contained a detectable amount of methamphetamine, the entire weight of the mixture should be included in calculating the base offense level.<sup>22</sup>

The Sentencing Guidelines promulgated in November 1991, although not applicable in this case, have changed the language in the Drug Quantity Table. Instead of referring to Methamphetamine and "Pure Methamphetamine," the Sentencing Guidelines now use the language Methamphetamine and Methamphetamine (actual). This change was probably intended to forestall challenges raised by defendants that their methamphetamine was not "pure" because it was not one hundred percent methamphetamine.

The result reached in Fowner is also more consistent with other circuit decisions involving mixtures of cocaine. See United States v. Restrepo-Contreras, 942 F.2d 96 (1st Cir. 1991) (finding that entire weight of cocaine and beeswax statute was to be included for sentencing), cert. denied, 112 S.Ct. 955 (1992); United States v. Mahecha-Onofre, 936 F.2d 623 (1st Cir.) (holding that entire weight of suitcases composed of cocaine bonded chemically with acrylic suitcase material was includable for sentencing purposes), cert. denied, 112 S.Ct. 648 (1991); United States v. Hood, No. 91-2216 (10th Cir. Feb. 5, 1992) (unpublished disposition) (holding that liquid waste surrounding cocaine base was properly included in determining weight of drug for sentencing purposes). But see United States v. Elmer Acosta, No. 91-1527 (2d Cir. May 13, 1992) (concluding that weight of creme liqueur in which cocaine was dissolved was improperly included in calculating

We are not faced with a situation where a defendant discards some independently acquired methamphetamine by throwing it into his fishpond or stock tank. Instead, the defendants here were convicted of manufacturing methamphetamine (and phenylacetone or P2P), and conspiracy to do so, and the samples tested by the Government of the mixtures found in the laboratory were in the formative stages of the manufacturing process. These circumstances provide strong support for consideration of the weight of the entire mixture for sentencing purposes.

Pollowing Walker, we hold that the district court did not err in sentencing the defendants on the basis of the entire 17.5 kilograms of the methamphetamine mixture.

# IV. Delegation Issue.

Two of the defendants contend that the DEA lacked authority to designate P2P as a Schedule II substance. We find no merit in this argument.

These defendants assert that the DEA Administrator's order designating P2P as a Schedule II substance is void because the authority to make such a designation is the non-delegable responsibility of the Attorney General. This argument is precluded by the statute itself: 21 U.S.C. § 871 establishes the propriety of the delegation at issue. Subsection (a) of section 871 provides

that the Attorney General "may delegate any of his functions under this subchapter to any officer or employee of the Department of Justice." Section 871 has been in effect without amendment since the original enactment of the Drug Abuse Brevention and Control Act in 1970 and was thus in effect when the DEA Administrator placed P2P on the Schedule II list of controlled substances.

The defendants ignore section 871 and instead rely on United States v. Spain, 825 F.2d 1426 (10th Cir. 1987), to support their contention. In Spain, the Tenth Circuit reversed a conviction for possession of a substance which had been placed on Schedule I by the DEA pursuant to 21 U.S.C. § 811(h), a provision added by the 1984 amendments. The court held that the 1973 delegation<sup>25</sup> to the DEA of the Attorney General's functions under the Drug Abuse Prevention and Control Act of 1970, although previously upheld for section 811(a), did not extend to section 811(h) because of the substantive and procedural differences between section 811(h) and section 811(a). Spain, 825 F.2d at 1429.

The designation provision in question here is section 811(e), which grants the Attorney General the authority to add immediate precursors of controlled substances to the list of those already regulated. Although there are no cases deciding the validity of delegation to the DEA under this provision, the Eleventh Circuit

offense level because liqueur was not ingestible); United States v. Rolande-Gabriel, 938 F.2d 1231 (11th Cir. 1991) (holding that the term "mixture" in U.S.S.G. § 2D1.1 does not include unusable mixtures of cocaine and liquid waste).

Sewell II and James Sherrod raise this issue.

Sections 811 and 871 are both part of Subchapter I of Chapter 13 of Title 21. The Administrator of the DEA is an "officer or employee" of the Department of Justice.

<sup>25</sup> See 28 C.F.R. \$ 0.100.

upheld the original delegation of authority to the Attorney General in United States v. Hope, 714 F.2d 1084 (11th Cir. 1983). The court found the discretion created by section 811(e) to be indistinguishable from that created by section 811(a). Hope, 714......
F.2d at 1087. Even the Spain court has upheld the delegation to the DEA of section 811(a) authority. Spain, 825 F.2d at 1427.

In addition, a recent Supreme Court decision disapproves of Spain and holds that delegation to the DEA of authority under section 811(h) is valid. Touby v. United States, 111 S. Ct. 1752, 1758 (1991).

In light of 21 U.S.C. § 871 and the decision of the Supreme Court in Touby, defendants' reliance on Spain is misplaced. Their argument that the DEA lacked authority to designate P2P as a Schedule II substance fails.

# V. Rynal Issue.

The defendants argue that their convictions for manufacturing methamphetamine violate the due process and equal protection clauses because the manufacturer of Rynal, an over-the-counter product containing methamphetamine, is not subject to the same penalties.<sup>26</sup>

21 U.S.C. § 811(g)(1) allows the Attorney General to exclude by regulation "any non-narcotic substance from a schedule if such substance may, under the Federal Food, Drug, and Cosmetic Act, be lawfully sold ever the counter without a prescription." At the time of the defendants' activity, the Attorney General had exempted Rynal from the list of Schedule II substances pursuant to this provision. 21 C.F.R. § 1308.22 (1989 Edition).27

Defendants claim that their due process rights have been violated because the statutes create an ambiguity by subjecting them to prosecution while exempting the manufacturer of Rynal. Two unpublished opinions of the Ninth Circuit have rejected this argument in similar contexts. See United States v. Farmer, No. 90-16557 (9th Cir. March 9, 1992) (holding that 21 U.S.C. § 811 and 21 C.F.R. § 1308.22 provide fair notice); and United States v. Worstell, No. 91-35208 (9th Cir. Dec. 16, 1991) (rejecting the contention that the regulatory scheme is so ambiguous that it fails to give sufficient notice that certain activity is deemed criminal). Furthermore, the defendants have made no showing that their product is eligible for the exemption or that they attempted to make use of the procedure for obtaining an exemption for their product and were denied.

Defendants contend that their conviction for manufacturing methamphetamine violates the equal protection clause because the manufacturer of Rynal is not similarly prosecuted. Because

There is no authority to support defendants' position. The defendants cite two cases that held that the removal of Rynal from the schedules of controlled substances did not operate to remove methamphetamine itself. See United States v. Roark, 924 F.2d 1426 (8th Cir. 1991); United States v. Housley, 751 F.Supp. 1446 (D. Nev. 1990), aff'd, 955 F.2d 622 (9th Cir. 1992). Defendants seek to distinguish their claims on the basis that this case concerns substances containing a detectable amount of methamphetamine rather than "pure" methamphetamine. This distinction is irrelevant in the context of the constitutional claims raised by the defendants.

Rynal has since been removed from the list of exempted substances. See 21 C.F.R. § 1308.22 (1991).

defendants' situation does not implicate either a suspect classification or the exercise of a fundamental right, the different treatment of defendants and the manufacturer of Rynal is subject only to rational basis analysis. Plyler v. Doe; 102 Section 2382, 2394-2395 (1982). The medicinal benefit of Rynal, together with its reduced potential for abuse, satisfy this review. See United States v. Worstell. 28

We conclude that the defendants' convictions for manufacturing methamphetamine do not violate the due process and equal protection clauses.

# VI. Conspiracy Count Issue.

Sewell II claims that the conspiracy count was defective because it alleged multiple criminal objectives and that the district court erred in refusing to dismiss it on that ground.

The defendants were charged with one count of conspiracy in violation of 21 U.S.C. § 846. The indictment alleged seven objectives of the conspiracy: (1-3) to manufacture P2P, amphetamine and methamphetamine; (4-5) to possess amphetamine and methamphetamine with the intent to distribute; and (6-7) to distribute amphetamine and methamphetamine. Each of the objectives of the conspiracy is prohibited by 21 U.S.C. § 841.

In Braverman v. United States, 63 S.Ct. 99, 102 (1942), the Supreme Court held that when there is a single agreement to violate several substantive statutes, the conspirators may not be prosecuted for more than one violation of the general conspiracy statute. This Court has held that a single conspiracy to import heroin could not violate both the general conspiracy statute, 18 U.S.C. § 371, and the statute that specifically prohibits conspiracies to import controlled substances, 21 U.S.C. § 963. United States v. Mori, 444 F.2d 240, 245 (5th Cir.), cert. denied, 92 S.Ct. 238 (1971). Neither holding applies to these facts.

Although count one of the indictment here alleges seven objectives of the conspiracy, the only conspiracy statute charged In addition, the only substantive statute is section 846. implicated is section 841. It is well established that a single conspiracy may have several objectives. United States v. Elam, 678 F.2d 1234, 1250 (5th Cir. 1982). See also Prohwerk v. United States, 39 S.Ct. 249 (1919) (conspiracy is a single crime, no matter how diverse its objects). A single charge may allege violations of more than one drug conspiracy statute. See United States v. Rodriguez, 585 F.2d 1234 (5th Cir. 1978), en banc, 612 F.2d 906 (5th Cir. 1980) (finding that Congress intended to permit the imposition of consecutive sentences for violations of 21 U.S.C. § 963 [conspiracy to import & controlled substance] and 21 U.S.C. \$ 846 [conspiracy to possess with intent to distribute], even though such violations arise from a single conspiracy having

Defendants also contend that the order exempting Rynal, 21 C.F.R. § 1308.22 (1989 Ed.), is properly read as exempting all substances containing dl-methamphetamine hydrochloride because the section 811(g)(1) exclusion authority is limited to substance, not products. We do not so read the order, which is plainly limited to the product Rynal, a spray manufactured by Blaine Co. Nothing even remotely similar to Rynal is involved here. The defendants may not use this criminal proceeding to collaterally expand the plainly limited exclusion.

multiple objectives)<sup>29</sup>, aff'd sub nom. Albernaz v. United States, 101 S.Ct. 1137 (1981).

The defendants here were convicted under a single conspiracy statute involving objectives prohibited by a single substantive or ruence statute, and were given cumulative sentences for the conspiracy and the substantive offenses. We hold that the indictment was not defective and that the district court did not err in refusing to dismiss it.

#### VII. Severance Issue.

Sewell II and James Sherrod claim that the district court erred in refusing to sever their trials and in allowing the Government to introduce evidence of extrinsic acts committed by their co-defendants.

The burden to show the need for severance is on the defendant, who must establish that he suffered compelling prejudice that the court could not prevent. United States v. Loalza-Vasquez, 735 F.2d 153, 159 (5th Cir. 1984). Severance is not required where only one conspiracy exists, even if the nature of the proof in each case differs, so long as the court below gives sufficient cautionary instructions. United States v. Rocha, 916 F.2d 219, 228 (5th Cir. 1990), cert. denied sub nom. Hinojosa v. United States, 111 S.Ct.

2057 (1991); United States v. Lamp, 779 F.2d 1088, 1093-94 (5th Cir.), cert. denied, 476 U.S. 1144 (1986). The defendants here were all charged in the same conspiracy. The district court cautioned the jury numerous times to consider the evidence as to each defendant separately.

Generally, the district court may adequately minimize prejudice to a co-defendant from extrinsic act evidence by giving limiting instructions. See United States v. Parziale, 947 F.2d 123, 129 (5th Cir. 1991), cert. denied, 112 S.Ct. 1499 (1992); United States v. Posner, 865 F.2d 654, 658 n.1 (5th Cir. 1989); United States v. Prati, 861 F.2d 82, 86-87 (5th Cir. 1988). Such instructions were given in this case.

Finally, prejudice from either the extrinsic act evidence or the failure to grant a severance was limited by the form of the jury verdict submitted by the district court that strongly reinforced the requirement that the jury consider each count and each defendant separately.<sup>30</sup>

We find no error on the part of the district court in refusing to allow a severance or in admitting extrinsic act evidence.

Rodriguez was overruled by United States v. Michelena-Orovio, 719 F.2d 738, 756-757 (5th Cir. 1983), cert. denied, 104 S.Ct. 1605 (1984), to the extent that it held that a defendant's guilt of conspiracy to possess with intent to distribute a controlled substance could not be inferred from the quantity of the substance that the defendant had conspired to import. Michelena-Orovio did not change the rule that a defendant may be convicted of violating both drug conspiracy statutes in connection with a single conspiracy.

The verdict form had a separate guilty or not guilty answer blank for each defendant as to each of the two substantive counts. As to the conspiracy count, there was first an answer blank as to whether the conspiracy charged was proved beyond a reasonable doubt to have existed; then (conditional on an affirmative answer to that question) separate answer blanks as to each defendant as to whether he was found beyond a reasonable doubt to be a member of the conspiracy, and (if so) then, as to each defendant, which of the seven alleged objectives he intended. All blanks were answered adversely to each of the appellants.

# Conclusion

The convictions and sentences of all appellants are

AFFIRMED.

Judgment-Page 5 of 7

Defendant: SEWELL, Jerry Wayne Case Number: B-89-44-CR(01)

#### STANDARD CONDITIONS OF SUPERVISION

While the defendant is on probation or supervised release pursuant to this Judgment:

- 1) The defendant shall not commit another Federal, state or local crime;
- 2) the defendant shall not leave the judicial district without the permission of the court or probation office
- 3) the defendant shall report to the probation officer as directed by the court or probation officer and shall submit a truthful and complete written report within the first five days of each month;
- 4) the defendant shall answer truthfully all inquiries by the probation officer and follow the instruction of the probation officer:
- 5) the defendant shall support his or her dependents and meet other family responsibilities;
- 6) the defendant shall work regularly at a lawful occupation unless excused by the probation officer for schooling, training, or other acceptable reasons;
- 7) the defendant shall notify the probation officer within seventy-two hours of any change in residence or employment;
- 8) the defendant shall refrain from excessive use of alcohol and shall not purchase, possess, use, distribut or administer any narcotic or other controlled substance, or any paraphernalia related to such substance except as prescribed by a physician;
- 9) the defendant shall not frequent places where controlled substances are illegally sold, used, distribute or administered:
- 10) the defendant shall not associate with any persons engaged in criminal activity, and shall not associate with any person convicted of a felony unless granted permission to do so by the probation officer
- 11) the defendant shall permit a probation officer to visit him or her at any time at home or elsewhere ar shall permit confiscation of any contraband observed in plain view by the probation officer;
- the defendant shall notify the probation officer within seventy-two hours of being arrested or questione by a law enforcement officer;
- 13) the defendant shall not enter into any agreement to act as an informer or a special agent of a law enforcement agency without the permission of the court;
- 14) as directed by the probation officer, the defendant shall notify third parties of risks that may be occasioned by the defendant's criminal record or personal history or characteristics, and shall permit the probatic officer to make such notifications and to confirm the defendant's compliance with such notification requirement.

These conditions are in addition to any other conditions imposed by this Judgment.

Order of Fifth Circuit Denying Petitions for Rehearing

#### IN THE UNITED STATES COURT OF APPEALS

FOR THE FIFTH CIRCUIT

FILED

No. 90-4467

AUG 0 3 1992

GILBERT E GANUCHEAU

UNITED STATES OF AMERICA,

Plaintiff-Appellee Cross-Appellant,

versus

JAMES EDWIN SHERROD,

Defendant-Appellant Cross-Appellee,

and

STEVEN LEE SHERROD, a/k/a William Wayne Embry and LONNIE JERRELL COOPER,

Defendants-Appellants,

JERRY WAYNE SEWELL, II and JERRY WAYNE SEWELL, SR.,

> Defendants-Appellants Cross-Appellees.

Appeals from the United States District Court for the Eastern District of Texas

ON PETITIONS FOR REHEARING

Before GARWOOD and DEMOSS, Circuit Judges, and LITTLE, District Judge.

#### PER CURIAM: "

Defendants Jerry Wayne Sewell, Sr. (Sewell, Sr.) and Jerry Wayne Sewell, II (Sewell II) were convicted, along with three codefendants, of three counts involving, inter alia, conspiracy to manufacture and the manufacture of methamphetamine and phenylacetone. We affirmed the convictions in United States v. Sherrod, No. 90-4467 (5th Cir. June 23, 1992). Sewell, Sr. and Sewell II now raise several issues in petitions for rehearing. We address these issues fully below and deny the petitions for rehearing.

# Claims Raised by Sewell, Sr.

Sewell, Sr. argues in his petition for rehearing that the district court erred in calculating his criminal history for the purpose of determining his sentence under the United States Sentencing Guidelines (U.S.S.G.). Specifically, he contends that his three prior convictions, although occurring on different dates, arose out of a common criminal episode and thus should have been

District Judge of the Western District of Louisiana, sitting by designation.

Local Rule 47.5 provides: "The publication of opinions that have no precedential value and merely decide particular cases on the basis of well-settled principles of law imposes needless expense on the public and burdens on the legal profession." Pursuant to that Rule, the Court has determined that this opinion should not be published.

considered a single conviction under the sentencing guidelines. Two of Sewell, Sr.'s prior convictions were for delivery of controlled substances; the third was for delivery of heroin.

U.S.S.G. § 4A1.2(a)(2) (1990)<sup>2</sup> provides that "[p]rior sentences imposed in unrelated cases are to be counted separately. Prior sentences imposed in related cases are to be treated as one sentence for purposes of the criminal history." Cases are related if they "(1) occurred on a single occasion, (2) were part of a single common scheme or plan, or (3) were consolidated for trial or sentencing." § 4A1.2, Application Note 3.

Sewell, Sr. did not raise this sentencing issue in his brief on appeal. Absent exceptional circumstances, we will not consider matters raised for the first time in a petition for rehearing.

Moore v. United States, 598 F.2d 439, 441 (5th Cir. 1979); United States v. Sutherland, 428 F.2d 1152, 1158 (5th Cir. 1970). It appears from the presentence report and the record of Sewell, Sr.'s sentencing hearing in the present case that the three prior convictions at issue arose from three offenses that occurred on

proceedings and sentencings. The fact that all of the convictions concern controlled substance offenses does not render them part of a "common scheme or plan." Even had Sewell, Sr. raised this issue in his brief on appeal, we would find that the district court's sentencing of Sewell, Sr. on the basis of the three prior convictions was not clearly erroneous.

Sewell, Sr. claims that we erred in our determination of the chemical mixture manufactured by the defendants, although it is not entirely clear from his brief in support of the petition for rehearing what errors are alleged. We reiterate (1) that the evidence amply supports the district court's findings that the mixture containing detectable amounts of methamphetamine was in the process of formation; and (2) that the district court did not err in sentencing the defendants on the basis of the amount of the methamphetamine mixture rather than on the amount of pure methamphetamine contained in the mixture. See United States v. Sherrod, slip op. at 5709-5711. In addition, we hold that the evidence supports Sewell, Sr.'s conviction of conspiracy to manufacture phenylacetone, amphetamine, and methamphetamine, and of the manufacture of phenylacetone and methamphetamine.

In the present case, Sewell, Sr. was sentenced to concurrent terms of 360 months on the 3 counts of conviction. This sentence was based on an offense level of 38 and a criminal history category of VI, which yield a sentencing range of 360 months-life. Sewell, Sr. was considered a career criminal under U.S.S.G. § 4B1.1 because he had at least two prior felony convictions for controlled substance offenses; thus his criminal history category was automatically a VI.

If his prior sentences are considered related and treated as one sentence, he would have a criminal history category of II, which, combined with the offense level of 38, would result in a sentencing range of 262-327 months.

The 1990 version of the U.S.S.G. was in effect at the time the defendants were sentenced in this action.

Sewell, Sr. contends in his petition for rehearing that the three prior convictions stemmed from the same original indictment. This is not sufficient to render the convictions related because they were later separated for trial and sentencing purposes. See U.S.S.G. § 4A1.2, Application Note 3.

In his appellate brief, Sewell, Sr. claimed that the evidence revealed a conspiracy to manufacture and the manufacture of amphetamine, not methamphetamine. It is unclear whether he is

# II. Claims Raised by Sewell II

Sewell II requests that we address on rehearing an issue that we inadvertently overlooked in our opinion. He contends that the district court erred in denying his motions for acquittal and for new trial on the grounds that the evidence was insufficient to support his conviction.

In weighing the sufficiency of the evidence, we view the evidence in the light most favorable to the government to determine whether the elements of the crime were proved beyond a reasonable doubt. Glasser v. United States, 80, 62 S.Ct. 457, 469 (1942); United States v. Skillern, 947 F.2d 1268, 1273 (5th Cir. 1991), cert. denied, 112 S.Ct. 1509 (1992). "The evidence is sufficient to support the conviction if a rational trier of fact could have found that the evidence established guilt beyond a reasonable doubt." Skillern, 947 F.2d at 1273. The requisite elements of a drug conspiracy are (1) the existence of an agreement, (2) the defendant's knowledge of the agreement, and (3) the defendant's voluntary participation in the agreement. \*\* United States v. Alvarado, 898 F.2d 987, 992 (5th Cir. 1990). See also United

States v. Stone, 960 F.2d 426, 430 (5th Cir. 1992).

Sewell II does not contest the existence of the conspiracy, only his awareness of and participation in it. "A defendant's knowledge of an illegal agreement and his participation in the scheme may be inferred from the circumstances." United States v. Garcia, 917 F.2d 1370, 1376 (5th Cir. 1990). All inferences and credibility choices are viewed in the light most favorable to the government. United States v. Harris, 932 F.2d 1529, 1533 (5th Cir.), cert. denied, 112 S.Ct. 270 (1991). A conviction will not be reversed for lack of evidence because the defendant played only a minor role in the conspiracy. Garcia, 917 F.2d at 1376.

Evidence at trial regarding Sewell II's awareness of and involvement in the conspiracy was not consistent. It is the role of the jury, and not of this Court, to choose which witnesses to believe. United States v. Jones, 839 F.2d 1041, 1047 (5th Cir.), cert. denied, 108 S.Ct. 1999 (1988).

The evidence linking Sewell II to the conspiracy includes the following. Danny Johnson, a government informant and witness, testified that Sewell II was present during conversations at Sewell, Sr.'s trailer concerning the preparations for the manufacturing process and that Sewell II helped bring chemicals and supplies from a storage area to load in the car that was going to the laboratory site;

- "Q Was there a meeting in the living room [of Sewell, Sr's trailer]?
- "A Yes, Sir.
- Q Who all was present during this meeting?

rearguing this point in his petition for rehearing. Darlene Roznovsky, a co-conspirator who testified for the government, testified that the conspiracy was to manufacture methamphetamine, and tests performed on the samples of the chemical mixtures found during the search of the laboratory revealed the presence of methamphetamine. We hold that there was sufficient evidence to support the convictions on these grounds.

If Sewell II's conviction of the conspiracy count is upheld, his convictions of the two substantive offenses will also be valid upon the theories of aiding and abetting or conspirators' liability under Pinkerton v. United States, 66 S.Ct. 1180, 1183-84 (1946). The district court instructed the jury on both theories.

- "A There was [Sewell, Sr.], Jack, J.D., Bubba, myself, Darlene and then as it went, then [Sewell II] and big Lisa got up.
- "Q When [Sewell II] came out, was he introduced to J.D. and Bubba?
- "A Not that I remember. Jack knew [Sewell II].
- "O Pardon me?
- "A I don't remember except Jack introduced [Sewell, Sr.] to J.D., Yeah, and Bubba.
- "Q All right. Did [Sewell, Sr.] carry on a conversation with J.D., James Edwin Sherrod?
- "A Yes, Sir.
- "Q And were you present during this conversation?
- "A Yes, Sir.
- "Q Was Bubba present during this conversation?
- "A Yes, Sir.
- "Q What about Jerry Wayne Sewell, II? Was he present?
- "A Back and forth, yes, Sir.
- "Q Where was Jerry Wayne Sewell, II. Back and forth to during the conversation?
- "A Well, in the kitchen and the bathroom. The living room and the bedroom where he was at was right there. It's like a half wall separates them. He got dressed and he come out and got him some coffee, went to the bathroom and he come back in there.
- "Q Could you hear a conversation in that bedroom next to the living room?
- "A Yes, Sir.
- "Q What happened during this conversation between [Sewell, Sr.] and J.D. or James Edwin Sherrod?

"A [J.D.] Was talking about what chemicals he needed, the quantity and what he could produce from that amount of chemicals and what he could make, what type of drugs he could make.

\*. . . .

. . . .

- "Q What happened during the conversation?
- "A Well, trying to see what type of -- like [Sewell, Sr.] asked him, 'What do you need?' and J.D., he was rattling off all these different types of chemicals and stuff and he couldn't get a certain chemical, that if he could get some other kind of stuff he could mix it and he would come up with it and [Sewell, Sr.] said, 'Well, I've got some stuff here.' And he had Darlene and [Sewell II] go get it from outsides somewheres, brought it in the house, and go through and see what he had on hand, what J.D. could use.
- "Q After [Sewell, Sr.] sent [Sewell II] and Darlene Rovznoski (sic) out to get some chemicals and lab equipment, did they come back with some chemicals and lab equipment?
- "A Yes, Sir.
- "Q What did Darlene and Jerry Wayne Sewell, II do with these chemicals and lab equipment?
- "A Set it down in the living room.
- "Q Were they in a package, were they in a box, were they in a bag? How were they packaged?
- "A Some in boxes and there was some in a plastic garbage like.
- "Q Were these various chemicals and pieces of lab equipment removed from the boxes and bags?
- "A Yes, Sir.
- "Q Were they done so in the presence of Darlene Rovznoski (sic) and Jerry Wayne Sewell, II?
- "A Yes, Sir.

\*. . . .

Johnson is listing co-defendants Jack Rhodes, James Edwin Sherrod (J.D.), Steven Sherrod, Darlene Roznovsky, and Lisa Ervin.

- "Q What happened next after Darlene made this list at the direction of [Sewell, Sr.] and J.D. Sherrod?
- "A We went ahead and loaded up the Cadillac with what we were going to bring from the house.
- "O What did you load in the Cadillac?

1 1 1 1 1 1

- "A Boxes - one box with some stuff in it with a plastic bag and then our suitcases and things.
- "Q Were these the items that Jerry Wayne Sewell, II. And Darlene Rovznoski (sic) had brought in from outside the trailer house?
- "A Yes, Sir.
- "Q Who helped load these chemicals and boxes and lab equipment into the Cadillac?
- "A Jerry Wayne, myself, Bubba and Jack.
- "Q When you refer to Jerry Wayne, are you referring to Jerry Wayne Sewell, II?
- "A Yes, Sir."

The testimony of co-defendant Jack Rhodes, who testified for the government pursuant to a plea bargain, differs on who brought the chemicals into the trailer house and whether Sewell II helped load the equipment into the Cadillac:

- "Q Did J.D. Sherrod examine any chemicals at that time?
- "A No, somebody went and brought them in. Danny and a girl brought some in there and he looked at them.
- "Q All right. Let me ask you this: Were some chemicals eventually brought into the house?
- "A Yes, they were.
- "Q And who brought those in?
- "A The best I can remember, Darlene and Danny Johnson and some other individual. I don't know his name. He

- ain't in this case, though, but he helped bring it in.
- \*. . . . .
- "Q Did you all load these chemicals anywhere?
- "A They were loaded into my car.
- "Q Who helped load your car up?
- "A Darlene and Danny done most of the loading. I was working on the other car. Me and Bubba was working on the other car.
- "Q Did you remember seeing Jerry Wayne Sewell, II there?
- "A Yeah, he just came back from going to the store, getting cigarettes, him and his girlfriend.
- "O Did Jerry Wayne Sewell, II help load the car?
- "A He came over there and looked and that's the best that I remember. If he done it, I don't remember whether he picked up anything or not. I ain't for sure on that, now.
- "Q Do you remember if Jerry Wayne Sewell, II handled any of the chemicals inside the trailer?
- "A I'm not for sure whether he did or didn't. Seems like he did but I ain't for positive on that, now."

Another witness for the government, co-defendant Darlene Roznovsky, had still another version of the events at the trailer:

- "Q Was Sewell, II and Lisa Payne at the trailer at that time?
- "A Yes, they were.
- "Q Were they -- would they have been close enough to overhear the conversation?
- "A If they had been standing there listening for awhile they would have understood the conversation.
- "Q What happened in the living room between Jack Rhodes and Sewell, Sr. and J.D. Sherrod and Bubba Sherrod?

- "A They were discussing how to produce methamphetamine and the chemicals and ways they were going to produce it.
- . . . .
- "Q At some point in time did Jerry Wayne Sewell, Sr. instruct you to obtain some chemicals?
- "A Yes, he did.
- "Q Tell us about that.
- "A I done this so many times before that I'm not sure if the chemicals were ever brought into the house, but me and either Jerry Wayne Sewell, II, or Glenn had went outside to get some chemicals and we were coming back to the trailer and a plumber was coming to fix a leak under the house --
- "Q What did you do at that time?
- "A We put the chemicals back into the truck and trailer.
- . . . .
- "Q Do you remember if you and Jerry Wayne Sewell, II, or Glenn ever went back out to the camper and brought chemicals back into the trailer?
- "A No, Sir.
- "Q If someone else testified that in fact you and Jerry Wayne Sewell, II, did that would that necessarily be incorrect?

"MR. FRY: your honor, I'm going to object to that as just an attempt to bolster this witness's testimony. She can only testify to what she knows.

"THE COURT: Restate your question, please.

"BY MR. JENKINS:

"Q Would it be incorrect if someone testified that you and Jerry Wayne Sewell, II, went out and retrieved chemicals from the camper and brought them back into the trailer?

"THE COURT: Wait a minute, wait a minute.
I'll let you ask this witness what she did or
didn't do but it sounds leading to tell her

something that occurred and ask her to say 'yes' or 'no.' Just as (sic) her what she did.

"MR. JENKINS: Okay.

#### "BY MR. JENKINS:

- "Q Do you remember whether or not you and Jerry Wayne Sewell, II, went back out to the trailer and eventually brought chemicals back in?
- "A No, Sir.
- "Q Why is that?
- "A I had been out to the trailer, outside in the truck and little trailer to get chemicals and drugs so many times that I will not remember the specific times.
- "Q Had you done that with Jerry Wayne Sewell, II, before?
- "A Yes, but it could have been for other things besides drugs so I can't really say we went out specifically to get drugs.
- "Q But I'm talking about chemicals, too.
- "A No.
- "Q Could you have gone out with Jerry Wayne Sewell, II, and retrieved chemicals and brought them back --

"MR. FRY: your honor, I'm going to object to that question. It's been asked and answered.

"THE COURT: It calls for her to speculate. I'm going to sustain the objection.

"BY MR. JENKINS:

"q so, do you know whether or not you went out and obtained chemicals with Jerry Wayne Sewell, II?

"A No, Sir."

The inference that Sewell II was aware of the existence of the conspiracy follows from the testimony of both Johnson and Darlene Roznovsky that Sewell II was present during the conspirators'

conversation about the chemicals and equipment needed.

Moreover, the evidence showed that, previously to the charged conspiracy (January-March 1989), Sewell II had participated with his father, Sewell Sr., in dealing in illegal drugs, including methamphetamine. Roznovsky testified that "on occasion" Sewell II participated in sales of methamphetamine arranged by Sewell Sr. Roznovsky also related a trip in March 1988 which she, Sewell Sr., Sewell II and another woman drove from Dallas to San Antonio, where they purchased 150 pounds of marihuana, then all drove to Florida, where it was sold, then drove to Louisiana, from whence Roznovsky and Sewell II drove to near San Antonio with part of the sales proceeds and Sewell II made a payment to one "Fred" and purchased half a pound of methamphetamine. Lisa Ervin testified that in 1988 Sewell II delivered methamphetamine to someone in Oklahoma, and on another occasion rode in the car where chemicals for the manufacture of methamphetamine were thus transported to Oklahoma. All this evidence legitimately bears on Sewell II's knowledge and intent.

Sewell II's participation in the conspiracy is a closer question. Although there is some dispute as to whether he brought in the supplies and helped load them into the Cadillac, we hold that a reasonable juror could choose to believe Danny Johnson's version of the events at the trailer. These acts are sufficient to support a finding that Sewell II was a participant in the

conspiracy.7

Sewell II cites two cases to support his claim that, even if he was present during his co-defendants' conversation at Sewell, Sr.'s trailer and even if he did help gather and load supplies, these actions are not enough to support his conviction. These cases are distinguishable. In United States v. Skillern, 947 F.2d 1268 (5th Cir. 1991), this Court reversed the conviction of a defendant on grounds of insufficient evidence. The strongest evidence against the defendant was the fact that he drove a coconspirator to a drug rendezvous and, in all likelihood, overheard the conversation between the co-conspirator and the undercover agent, and was thus in a "suspect 'climate of activity.'" Skillern, 947 F.2d at 1273-74. Although the panel deciding Skillern was suspicious of the defendant's knowledge of the conspiracy, the speculation that the defendant knew the purpose of the rendezvous before overhearing the conversation was insufficient to sustain the conviction.

In the case before us, it was possible for the jury to infer that Sewell II overheard the conversation concerning the preparations for manufacturing methamphetamine. Under Skillern, this alone would be insufficient to support his conviction. But here there is some evidence that Sewell II, following this conversation, was instructed to help gather together the requisite chemicals and supplies, the subject of the foregoing conversation,

The district court recognized Sewell II's limited role in the conspiracy and reduced his offense level by four levels on the grounds of his minimal participation. U.S.S.G. § 3B1.2(a).

that were stored on Sewell, Sr.'s property, and that he helped load them into a car. A reasonable juror could conclude that, not only was Sewell II aware of the existence of the conspiracy, he had acted voluntarily in furtherance of it.

In United States v. Perrone, 936 P.2d 1403 (2d Cir. 1991), a conviction was reversed where

"the only concrete evidence against [the defendant] was that he assisted in loading a van with materials whose nature he was not shown to have understood, and participated in transporting and unloading them. Such activity was consistent with his normal duties [of employment]."

Perrone, 936 F.2d at 1410. The court found this evidence to be insufficient, applying a test that, in cases where a defendant's involvement is minimal, there must be "'independent evidence tending to prove that the defendant in question had some knowledge of the broader conspiracy.'" Id. (quoting United States v. De Noia, 451 F.2d 979, 981 (2d Cir. 1971)).

Here, Sewell II helped to load the chemicals after hearing the conversations concerning their intended illegal use. He was aware of the nature of the items he was handling. Further, his actions were not those of an employee, as in Perrone.

See United States v. Garcia, 917 F.2d 1370, 1376 (5th Cir. 1990) (where we held sufficient to support a conspiracy conviction contested testimony that a defendant knew that a vehicle left in his care contained marijuana.)

Although we acknowledge that this may be a close question, we hold that the evidence was sufficient to support Sewell II's conviction.

The petitions for rehearing are DENIED.

J. DRiver

There is in Orange County, Texas a tract of land commonly referred to as Dan's Auto located at Rt 3 Box 512, Orange, Texas with three trailers, one bus, and numerous junk vehicles located thereon, being a tract approximately two acres in size and more specifically described by location and description below. To arrive at the tract of land with buildings and trailers thereon, one may travel from the intersection of state highway 62 and Interstate 10 West on the north-side service road approximately 1.9 miles to an unpaved road or driveway, adjacent to and west of the building known as Coastal Technical Services Company. At said suspected location there is one certain mail box labeled:

"Dan's Auto
Hill
Rt 3 Box 512"

This unpaved roadway or driveway is also approximately one-tenth mile west of the intersection of the service road previously described with Jackson Street in Orange County, Texas. The unpaved roadway or driveway runs in a northerly direction away from Interstate 10. The mailbox previously described can be found on the west side of the intersection of the said unpaved roadway or driveway with the service road. From that location, travelling in a northerly direction onto the unpaved roadway or driveway approximately one hundred yards is a single story trailer house residence located on said suspected tract of land on the east side of the unpaved roadway. Said single story trailer house residence, is beige in color, with green trim, and has a window on the south side with a dark blue covering on it next to the front door of the

Exhibit A

OO'S

trailer. At said suspected tract of property is also located an old transit bus being white on top, grey color along the bottom, and trimmed in red parked at the east end of the trailer house residence previously described. There is a sign on the back of the bus that states "IN TOW." There is additionally at the opposite end of the bus from the trailer house residence an additional trailer positioned in approximately in a north/south direction on the tract of land. This trailer is off white in color with green trim around the top and black shutters displayed thereon. There is in the general area between the trailer just described and the unpaved roadway a smaller travel trailer on said tract of property. Furthermore, to further describe the tract of land, there are numerous old junk or abandoned vehicles located on the property as well as a two toned blue Chevrolet Van parked at the west end of the trailer first described herein.

#### ORDER

This Court having issued a search warrant in the above-captioned case for the seizure of, inter alia, chemicals which could be used in the manufacture of a controlled substance; and the Government having requested, based on the facts set forth in the Affidavit filed in support of the search warrant, authorization for disposal of any such chemicals;

IT IS HEREBY ORDERED that any duly authorized Special Agent of the Drug Enforcement Administration may, in a proper manner, dispose of any chemicals seized in connection with the execution of the search warrant in the above-captioned case provided that samples can be preserved, and/or photographs are taken of the chemicals and their containers. If, in the opinion of the Special Agent, the sampling of these chemicals posses a significant risk to the executing agents and officers then it is hereby Ordered that these chemicals be destroyed without sampling, provided that photographs are taken of the containers and chemicals prior to the destruction.

SIGNED and ENTERED this the //d day of March, 1989.

Mag. No. B-89-211-17

GOVERNMENT'S MOTION FOR AUTHORIZATION TO DISPOSE OF CHEMICALS

TO THE HONORABLE JUDGE OF SAID COURT:

COMES NOW the United States of America, by and through its
United States Attorney for the Eastern District of Texas, and would
file this its motion to authorize the Drug Enforcement Administration
through its contract disposal custodian Disposal Service Inc. to
dispose of any such chemicals seized in the above captioned case
based upon the search warrant issued by this Court.

1

The United States Attorney for the Eastern District of Texas and the Drug Enforcement Administration are currently seeking a search warrant for the property located and described in the application and affidavit for search warrant.

2.

The government further states that there is reason to believe that there is an operational amphetamine/methamphetamine laboratory

and its accompanying precursor chemicals at the location described in the search warrant.

3.

The government further states that precursor chemicals commonly found at amphetamine/methamphetamine laboratories are usually volatile and/or toxic.

4.

Wherefore the government respectfully request this Court to issue an order as follows directing that the Drug Enforcement Administration through its contract custodian Disposal Service Inc. dispose of any such volatile and/or toxic chemicals in accordance with existing policies of the the Drug Enforcement Administration and the law.

Respectfully submitted,

BOB WORTHAM UNITED STATES ATTORNEY

operable on the converted bus and opening the passenger door and the rear emergency exit door. Entry to the bus had been gained through the rear emergency exit door. While making an assessment of the clandestine laboratory, SA Shoquist and Agent Palmer observed a reddish brown liquid (Exhibit #1) of suspected phenylacetone at a full boil in a 5,000 milliliter three neck beaker, approximately 3/4 full. The agents also observed a stainless steel par setting on a space heater (which was not on) that appeared to be amphetamine or methamphetamine in its initial synthesis. After ventilating the clandestine Lab, the agents/officers exited the laboratory and confirmed with other officers and agents that the defendants and premises were secure. SA's Shoquist and Humphreys then conferred with DEA Chemist George Lester and DPS Chemist Randy Snyder regarding the laboratory. Mr. Lester and Mr. Snyder then entered the clandestine laboratory to prepare for processing of evidence to be seized. At this time, Oranga Police Department Task Force Inv. Johnsy Butler entered the clandestine laboratory and made a video tape of all chemicals in synthesis, precursor chemicals, glassware, and lab paraphenalia contained in the converted bus. The video tape was made at approximately 4:30PM and has been retained as non-dreg Exhibit N-24 in this investigation.

- handcuffed and in the custody of Orange County Deputy Sheriff Dennis Dorsey. Deputy Dorsey stated he had participated in the arrest of SHERROD in the rear mobile home (east) of the premises and read SHERROD his rights. SA Shoquist again read SHERROD his rights, as witnessed by Deputy Dorsey. Should be shown to an attorney before answering any quastically was not asked anymore questions by arresting agasts or officers have to Orange County SO Report of Investigation by Deputy Dorsey during the processing of evidence in the libraries of Investigation by Deputy Dorsey dated March 11, 1989). SA Shoquist was also advised by Orange PD Inv. Butler that Danny HILL and his wife had been read their rights by Inv. Butler at approximately 4:20PM. HILL and his wife declined to make any statement at that time.
- the laboratory by taking restative seedles of suspected phenylacetone, amphetamine, and methamphetamine in various stages of synthesis, and representative samples of precursor chemicals. Orange County PD Identification Officer Steve M. Jones also processed glassware and other items for latent fingerprints after representative samples were taken. Officer Jones is maintaining custody of the latent fingerprints to be compared against known defendants in this case.
- 5. Samples from the following described drug/precursor chemicals were taken to be submitted to the DEA Laboratory for analysis:

DEA form - 64

TO GOOD IDENTIFIED

Exhibit #1 (suspected phenylacetone) is a reddish brown liquid contained in a 5,000 milliliter three neck beaker, approximately 3/4 full, seated in an electromantle heater on the floor near the passenger door of the converted bus. The three neck beaker had two condensing tubes extending from the necks and tied off to a shelf in the bus. The beaker was at a full boil at the time of entry.

Exhibit #2 (suspected phenyladetone) is a reddish brown liquid contained in a 500 milliliter seperatory funnel, which was full. Exhibit #2 was on a table below the second window on the left from the front of the bus.

Exhibit #3 (suspected phenylacetone) is a reddish brown/clear liquid in a 1,000 milliliter separatory funnel, which was full. Exhibit #3 was also found on the table below the second window on the left from the front of the bus.

Exhibit #4 (suspected methamphetamine or amphetamine) is a milky liquid with a brown scum, approximately 1,000 milliliters in volume contained in a 8" X 16" X 6" deep stainless steel pan found sitting on a brown gas space heater (turned off) below the third window on the right from the front of the bus.

Exhibit #9 (suspected methamphetamine or amphetamine) is a pea green liquid contained in a stainless steel pressurized "coke" canister containing approximately 2,000 milliliters in volume. Shredded aluminum foil was clearly visible in the bottom of the canister after its contents were emptied out. Exhibit #5 was found on the top step near the front passenger exit of the bus.

Exhibit 16 (suspected methaspheramine or ampheramine) is a reddish brown liquid contained in a 1 quart mason jar, approximately 1/2 full. Exhibit 16 was located on the table below the second window of the left from the front of the bus. Exhibit 16 is believed to be what is commonly called "ether wash".

Exhibit #7 (suspected methamphetamine or amphetamine) is a dark reddish brown thick liquid, approximately 300 milliliters in volume contained in a 1 quart measuring cup. Exhibit #7 was located on the table below the second window on the left from the front of the bus.

#### FILE NO. 2. G-DEP IDENTIFIER MX-89-0011 102-51 REPORT OF INVESTIGATION 3. FILE TITLE (Continuation) SEWELL, Jerry W. Page 4 of 8 A. DATE PREPARED L PROGRAM CODE March 14, 1989

Exhibit #8 (suspected phenylacetic acid) is a white powder contained in a I gallon quantity brown jug labeled phenylacetic acid, which was full. Exhibit #8 was located in a non-functional deep freeze on the right in the rear of the bus.

Exhibit 49 (suspected agetic anhydride) is a clear liquid contained in an approximately 1/2 full | gallon jar labaled acetic anhydride. Exhibit #9 was also contained in the deep freeze in the rear of the bus.

Exhibit #10 (suspected merlylamine) is a clear liquid contained in a brown 1 gallow jug, approximately 114 full labeled methylamine. Exhibit #10 was also found in the deep freeze at the back of the bus.

Exhibit All (suspected formamide) is a clear liquid contained in a full I gallon jug labeled formanide. Exhibit #11 was also located in the deep freeze in the rear of the bus.

Exhibit #12 (suspected sodium acetate) is a white powder contained in a opaque plastic gallon jug, approximately 1/4 full labeled sodium acetate. Exhibit #12 was also found in the deep freeze in the rear of the bus.

it should be noted that the search varrant issued by US Hamistrate Earl Hinds also contained a destruction grant ambutining the galatie agents to destroy suspected toxic or hazardous chemicals found at the classian laboratory. The following items were seized and subsequently released to DPS Chemist Randy Snydes to be used in connection with DPS Training or Laboratory Analysis.

> one full gallon jug of formanide. One gallon jue. approximately 374 full of acetic anhydride.

One plastic gallon jar containing phenylacetic acid.

Om Corning grand 22,000 millilliter three neck beaker, round bottom.

The following items were seized and subsequently released to Resource Transportation Services, Inc., DBA Disposal Systems, .ac., Deerpark, Texas.

One full I gallon jug of formanide.

Two I gallon jugs of acetic anhydride (one empty and one 3/4 full).

Two 1 gallon plastic containers of phenylacetic acid (one full and one

approximately 1/6 full)

One gallon jug of methylamine (approximately 1/3 full)

One gallon container of petrolium ether (empty)

> Seven brown glass | gallon jugs (empty) One pint plastic bottle bottle of hydrogen peroxide (full) One pint bottle chloroform (1/8 full) One 500 milliliter cylinder of ECL gas (full) One gallon container formic acid (full) One pint brown bottle of an unknown petrolium base fuel (full) One pound plastic bottle of sulphur sublimed (full) One 100 gram bettle mercuric chloride (full) One 11.5 gram bottle calcium hydroxide (approximately 2/3 full) One 2.5 kilegram container of sodium hydroxide (full) One gallon plastic container of sodium acitate (approximately full) One 16 onnce plastic bottle of rubbing alcohol believed to be contaminated (approximately 2/3 full) Two I gallon glass jugs of hydrochloric acid (one full and one 1/2 full) One I liter metal can ethylether anhydrous One O'Haus Triple Beam Balance Scale (2,610 gram capacity, contaminated with precursor chemicals) One 4 liter bottle acetone GR (full) Two glass condensing tubes about 36" long One 5,000 milliliter three neck beaker One 500 milliliter seperatory funnel One 1,000 milliliter seperatory funnel One 8" X 16" X 6" stminless steel pan One stainless steel pressurized canister One I quart mason far One I quart measuring cup One three meck beaker One 16 ounce can "Hunco" ether CP One electric vacuum pump contaminated with predursor chemicals One Electromantle heater contaminated with predursor chemicals Miscellaneous filter and PH test paper contaminated with chemicals Miscellaneous assorted contaminated laboratory glassware, hoses, tubing, commecters, etc. for laboratory equipment/

6. Also observed inside the trailer, and video taped, was one Uniden police scanner, one two-way intercom for communications between the bds and HILL mobile home, and two aicrowave ovens. These items were observed, video taped; however, they were not seized due to their being contaminated with precursor chemicals. At the conclusion of the processing of evidence. Danny HILL was given a DEA Form 12 receipt for the items seized and those items released to Resource Transportation Services, Inc. for destruction. HILL and SHERROD were transported to the Jefferson County Jail by Orange County Deput? Sheriff Inv. 's Dennis Dorsey and Jessie Romero and lodged pending formal filing of complaint.

#### OTHER OFFICERS:

SA Richard Humphreys, DPS Agent Don Palmer, DPS Chemist Randy Snyder, DEA Chemist George Lester, Cacasieu Parish Deputy Sheriff Dale Folds, Orange PD ID Officer Steve M. Jones, Orange County Deputy Sheriff Dennis Dorsey

### DESCRIPTION AND CUSTODY OF DRUG ENIDENCE:

- 1. Exhibit #1, FDIN #89024780, is 92.5 grams gross weight sample of approximately 3,750 milliliters of suspected phenylacetode seized by SA Milton E. Shoquist and Chemist George Lester from an operational clandestine lab in a converted bus body located at Route 3 Box 512, Orange County, Texas Exhibit #1 was collected by DEA Chemist Lester, as witnessed by SA Shoquist, initfaled, field tesded, and maintained in SA Shoquist's custody until 3/13/89 when Exhibit #1 was weighed and sealed, w witnessed by SA Richard Humphreys. Exhibit #1 was mailed via registered mail, return receipt requested, to the DEA Lab in Dallas, Texas for analysis.
- 2. Exhibit #2, FDIN #89024780, is 86.9 grams gross weight sample of approximately 500 milliliters of suspected phenylacetone seized from an operational claudestine lab in a converted bus body located at Route 3 Box 512, Orange County, Texas. Exhibit #2 was collected by DEA Chemist George Lester, as witnessed by \$A Shoquist on 3/11/89, initialed, field tested, and maintained in SA Shoquist's custody until 3/13/89 when Exhibit #2 was weighed and sealed, as witnessed by SA Richard Bumphreys. Exhibit #2 was mailed via registered mail, return receipt requested to the DEA Lab in Dallas, Texas for analysis.
- 3. Exhibit #3, PDIN #89024780, is 89.1 grams gross weight sample of approximately 1,000 milliliters of suspected phenylacetone. Exhibit #3 was seized from an operational clandestine lab in a converted bus body located at Route | Box 512, Orange County, Texas. Exhibit #3 was collected by ARA Chemist George Lester, as witnessed by SA Milton Shoquist on 3/11/89, field tested, initialed, and maintained in SA Shoquist's custody until 3/13/89 when Exhibit #3 was weighed and sealed, as witnessed by SA Richard Sumphreys. Exhibit #3 was mailed via registered mail, return receipt requested to the DEA Lab in Dallas, Tesas for analysis.
- 4. Exhibit /4, FDE #89024793, 10 250.9 grams grow weight sample of approximately 2,000 milliliters of suspected methasphetamine or amphetamine seized from an operational clandestine lab in a converted bus body located at Route 3 Box 512, Orange County, Texas. Exhibit #4 was collected by DEA Chemist George Lester, as witnessed by SA Milton Shoquist on 3/11/89, field tested, initialed, and maintained in SA Shoquist's custody until 3/13/89 when Exhibit #4 was weighed and sealed, as witnessed by SA Richard Bumphreys, Exhibit #4 was mailed via registered mail, return receipt requested to the DEA Lab in Delles, Texas for analysis.

- 5. Exhibit #5, FDIN #89024793, is 270 grams gross weight sample of approximately 2,000 milliliters of suspected methamphetamine or amphetamine seized from an operational clandestine lab in a converted bus body located at Route 3 Box 512, Orange County, Texas. Exhibit #5 was collected by DEA Chemist George Lester, as witnessed by SA Milton Shoquist on 3/11/89, field tested, initialed, and maintained in SA Shoquist's custody until 3/13/89 when Exhibit #5 was watghed and sealed, as witnessed by SA Richard Bumphreys. Exhibit #5 was mailed via registered mail, return receipt requested to the DEA Lab in Dallas, Texas for shalysis.
- 6. Exhibit #6, PDIN #89024793, is a 237 6 grams gross weight sample of approximately 500 milliliters of suspected methamphetamine or amphetamine seized from an operational clandestine lab in a converted buy body located at Route 3 Box 512, Orange County, Texas. Exhibit #6 was collected by DEA Chemist George Lester, as witnessed by SA Milton Shoquist on 3/11/89, field tested, initialed, and maintained in SA Shoquist's custody until 3/13/89 when Exhibit #6 was weighed and scaled, as witnessed by SA Richard Humphreys. Exhibit #6 was mailed wis registered mail, return receipt requested to the DEA Lab in Dallas, Texas for analysis.
- 7. Exhibit #7, PDIN #89024793, is a 159.8 grams gross weight sample of approximately 300 milliliters of suspected methamphetamine or amphetemine seized from an operational clandestine lab in converted bus body located at Route 3 Box 112, Orange County, Texas. Exhibit #7 was collected by DEA Chemist George Lester, as witnessed by SA Milton Shoquist on 3/11/89, field tested, initialed, and maintained in SA Shoquist's custody until 3/13/89 when Exhibit #7 was weighed and scaled, as witnessed by SA Richard Humphreys. Exhibit #7 was mailed wis registered mail, return receipt requested to the DEA Lab in Dallas, Texas.
- 8. Exhibit #8, is a 38.9 grams gross weight sample of approximately 10.5 pounds of suspected phenylacetic acid seized from an operational claudestine lab in a converted bus body located at Route 3. Box 512 Orange County, Texas. Exhibit #8 was collected by DEA Chemist George Lester, as witnessed by SA Milton Shoquist on 3/11/89, field tested, initialed, and maintained in SA Shoquist's custody until 3/13/89 when Exhibit #8 was weighed and sealed, as withposed by SA Richard Bumphreys. Exhibit #8 was mailed via registered mail, return receipt requested to the DEA Lab in Callas, Texas for analysis.
- 9. Exhibit 19, 100 46,4 grams gross veight sample of approximately 1.5 gallons of acetic anhydride collect from an operational clandestine lab in a converted bus body located at Route 3 Bez 512, Orange County, Texas. Exhibit #9 was collected by DE Chemist George Leeter, as witnessed by SA Milton Shoquist on 3/11/89, initialed and maintained in SA Shoquist's custody until 3/13/89 when Exhibit #9 was weighed an sealed, as witnessed by SA Richard Humphreys. Exhibit #9 was mailed via registere mail, return receipt requested to the DEA Lab in Dallas, Texas for analysis.
